

Language Data Commons of Australia

# 2025

## YEAR IN REVIEW

# FOREWORD

**2025 was a productive year for the Language Data Commons of Australia (LDaCA). We expanded collections, strengthened our tools and supported a wide range of research using LDaCA resources.**

This year, LDaCA collections and tools were used in studies on Australian slang, parliamentary language, online discourse and even featured in a number of news stories. We delivered well-attended workshops and webinars and delivered another iteration of the Graduate Digital Research Fellowship program. We also collaborated on cross-institutional projects, including the Precarious Victorian Oral History Collections Project and the development of person-centred digital collections such as *Arne ingkerreke apurtelheileme*, the Veronica Dobson website. Our technology and research teams also advanced RO-Crate interoperability, released new tools and deepened partnerships across the sector.

In 2026, we are excited to continue improving LDaCA platforms and resources. We are looking forward to developing workflows for interactive

deposits, broadening the range of language data available and releasing new analytical notebooks and tools. We are also committed to sharing LDaCA's approaches more widely across disciplines and further strengthening our governance frameworks to support ethical, sustainable data stewardship.

We extend our thanks to the LDaCA team, our partners and our Steering Committee for their steady support throughout the year. Their expertise and collaboration have been central to progressing our technical, governance and engagement work. We are deeply grateful for the commitment each person brings to the project.

# SUPPORTING DATA DISCOVERY

## Demonstrating LDaCA's impact through use of language data

### "More tucker than you could poke a stick at!" research paper

In January, a journal article from PhD candidate Madeleine Clews (University of Western Australia), published in the *Australian Journal of Linguistics*, showcased the impact of LDaCA collections for researchers. The article, ““More tucker than you could poke a stick at”: The bicultural journey of an enduring Australianism”, explored the development, use and longevity of ‘tucker’ in Australian speech, making comparisons between mainstream Australian English and Aboriginal English. Clews cited the Corpus of Oz Early English (COOEE), AustLit and the Australian Radio Talkback corpora, accessed through our data portal, to support her argument.

[Read the article >](#)

### Australian slang as a literary genre

In February, Research Support and Training Lead Simon Musgrave published a journal article titled ‘Australian slang as a literary genre’ in the *Australian Journal of Linguistics*. Simon used four collections from the LDaCA Data Portal — the Australian Corpus of English, the Australian component of the International Corpus of English (ICE), Australian Radio Talkback and Braided Channels — to strengthen his argument that there is a tradition of Australian writers inventing expressions which they treat as being part of Australian slang. Simon also published a [blog post](#) discussing how vital access to these data collections was for enriching his research.

## Highlights

new datasets on the LDaCA Data Portal

The screenshot shows the LDaCA Data Portal interface. At the top, there is a search bar with the query "data.ldaca.edu.au/search?s=1765772050367". Below the search bar, the LDaCA logo is displayed. The main content area is titled "AusReddit aggregated data - Collection". It includes a brief description: "This dataset is a collection of individual RO-Crates, each containing specific aggregated data or resources derived from the AusReddit Collection held by the Digital Observatory at QUT. The purpose of the collection is to allow discovery of the AusReddit Collection and...". It shows "Objects: 6, Files: 6" and a "See more" link. On the right side, there are download links for "PDF" and "CSV". Below this section, another dataset is listed: "The La Trobe Corpus of Spoken Australian English".

### Australian Slang Survey Data

This dataset consists of responses to an online survey which elicited information about Australian slang. Respondents were asked to provide slang expressions in response to a variety of prompts.

[More about the data set >](#)

### Sydney Speaks

A compilation of three sub-corpora of Australian English, made up of sociolinguistic interviews and oral histories. Recordings are from a total of 260 speakers, born from the 1890s to the 1990s, recorded in the 1970s-1980s and 2010s-2020s.

[More about the data set>](#)

### Australian Twittersphere aggregated data

This dataset is a collection of resources derived from the Australian Twittersphere Collection held by the Digital Observatory at QUT. Content examples include Australian Twittersphere hashtags, N-grams and more.

[More about the data set >](#)

### AusReddit aggregated data

This dataset is a collection of resources derived from the AusReddit Collection held by the Digital Observatory at QUT. Content examples include AusReddit topics, daily emotions and more.

# TACKLING DATA CHALLENGES

## Addressing practical barriers to working with language data

### “How is that unparliamentary?”

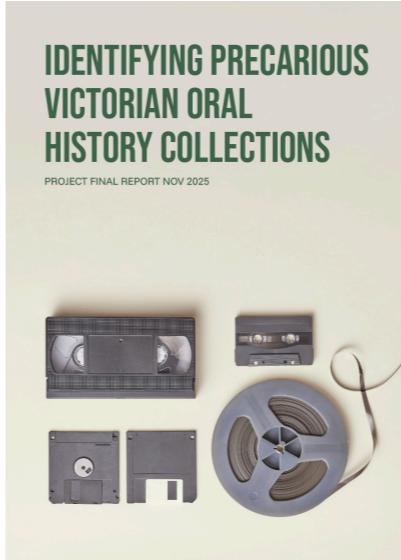

In June, Research Analytics Lead Sam Hames, Michael Haugh and Simon Musgrave published a journal article in *Lingua* titled “How is that unparliamentary?": The metapragmatics of ‘unparliamentary’ language in the Australian Federal Parliament. The article dove into data from the Australian Federal Hansard to analyse occurrences of language deemed ‘unparliamentary’. Sam, Michael and Simon drew on computational methods to explore how the boundaries of offensive, objectionable or disorderly language in parliamentary discourse are established, maintained, contested and changed over time.

In a [blog post](#), Simon discussed the challenges of working with this unwieldy data source. In the post, he unpacked how they approached issues of access and scale to use this data source effectively. Sam, Michael and Simon’s work with the Australian Federal Hansard later led to a series of workshops introducing HASS researchers to the rich possibilities of working with Hansard.

[Read the journal article >](#)

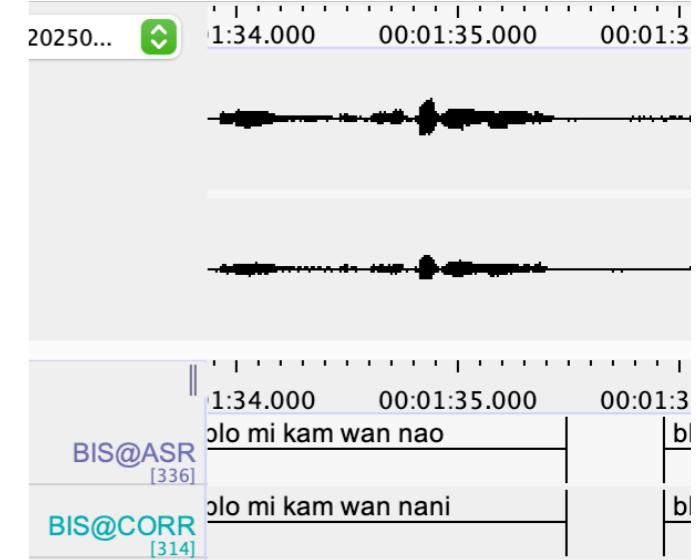

**Image** Simon Musgrave and Sam Hames deliver a workshop on exploring Hansard for HASS researchers.

### Precarious Oral Histories

LDaCA researchers at the Australian National University launched the Identifying Precarious Victorian Oral History Collections project this year, led by Research Project Manager Anisa Puri. Oral history collections hold invaluable insights into our historical, cultural and linguistic past, yet little is known about precarious collections that are at risk of being lost. This project took an important first step by identifying and gathering metadata about such collections in Victoria. The project identified 189 collections. The collections were created between the 1960s and 2020s, spanned 29 subject areas and included a total of 9,136 interviews with an average interview length of 1.11 hours. The team produced a final report sharing these findings, as well as an online database listing the collections.

[View the report >](#) | [View the database >](#)

### Transcribing and translating Bislama

Two PhD students, Raphaël Merx and Aso Mahmoudi, worked with Chief Investigator (CI) Nick Thieberger to build systems for converting Bislama (Vanuatu) audio recordings to text and then translating them into English.

[Read the blog post >](#)

# BUILDING & USING TECHNOLOGIES & TOOLS

Developing tools and enabling their use in language research

## Quotation Tool in use

The ATAP Quotation Tool continues to support linguistic research through the analysis of reported and quoted speech. This year, it featured in two studies examining sentiment and representation in media texts.

CI Monika Bednarek, with colleague Maite Taboada (Simon Fraser University), used the tool to compare sentiment in quoted and non-quoted news discourse in their article ['Attitude in Reported and Non-reported News: A Critique of Sentiment Analysis in Corpus Pragmatics.'](#) The study showed how sentiment analysis can support exploration, but should be paired with qualitative analysis.

The tool also supported University of Sydney student Melissa Kemble's PhD research. Her thesis, ['A corpus-based critical discourse analysis of gender bias and evaluation in Australian Rules Football and Rugby League sports news discourse'](#), analysed gender stereotypes in Australian sports reporting by examining who is quoted and how emotion is attributed to female and male athletes.

[Access the Quotation Tool on Github >](#)

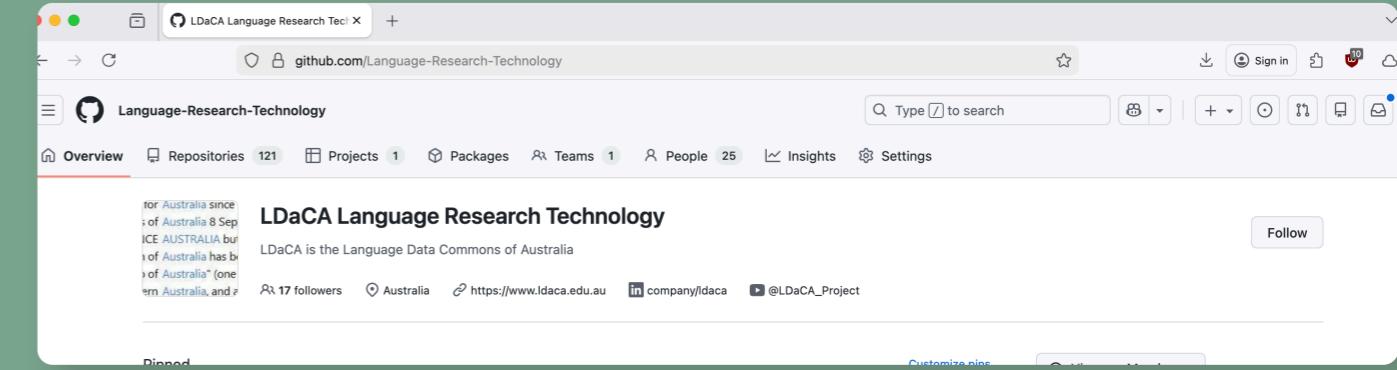

## AROC API release

2025 saw the development of exciting work for LDaCA and its partners. PARADISEC colleague John Ferlito developed a simpler, shared API that can support both PARADISEC and LDaCA, with potential application across other repositories, including the [Nyingarn Repository](#).

This new RO-Crate API, known as AROC API, is a generic API for collections described using RO-Crates. LDaCA has worked closely with John throughout its development, including building a new Oni stack based on the API. AROC API is designed to extend data portals and provide a common foundation for RO-Crate-based infrastructure. It works out of the box with standard portal interfaces, while remaining flexible enough to support different audiences, domains and authentication models.

PARADISEC has implemented the RO-Crate API in its admin tool, with the new Oni Portal set to replace the frontend in early 2026. It currently hosts 18,400 hours of audio in over 1,400 languages and continues to grow.

[Access AROC API on Github >](#)

## Crate-O HTML Lite Display

**Crate-O HTML Lite Display** is a tool to create a static RO-Crate preview HTML file. It was used in the development of [Ayeye Thipe-akerte](#), a website featuring Eastern Arrernte language information about birds, with original artwork from Eastern Arrernte artist and writer Therese Ryder. Originally one in a series of bird apps produced by Batchelor Institute, it is the first to be re-released in a format based on principles of long-term safekeeping.

## CADRE integration for Data Portal access

The LDaCA Data Portal's authentication process was updated to incorporate CADRE, a wrapper for REMS that improves the user experience of the authentication procedure.

## RO-Crate tabulator

Sydney Informatics Hub developed the **RO-Crate Tabulator**, a Python library to turn an RO-Crate into tabular formats.

## COOEE Notebook

The **COOEE Notebook** is a Jupyter notebook for viewing stratified topics in the COOEE collection.

## RO-Crate MASP

The **RO-Crate Machine Actionable Schemas and Profiles** is a prototype and proof of concept for a process implementing Schemas and Profiles in RO-Crates.

## Analytics tools

Four new analytics tools were released including the [Web Archive Manager \(WAM\)](#), [Word Transcript Tabulator](#), [Text Analytics Tools Web Application](#) and the [Image Dataset Explorer](#).

## Lameta update

Lameta is a tool for creating collection metadata in the field. Updates in 2025 include output to RO-Crate to fit with LDACA's technical recommendations.

## Nyingarn maintenance

**Nyingarn** is a secure workspace for creating textual versions of manuscripts. Led by CI Nick Thieberger, it has 1,466 items and 360 users. LDACA supported ongoing maintenance work on Nyingarn in 2025.

# COLLABORATING FOR IMPACT

## Working together to deliver meaningful projects

### **Arne ingkerreke apurtelhe-ileme (Gathering all the things together)**

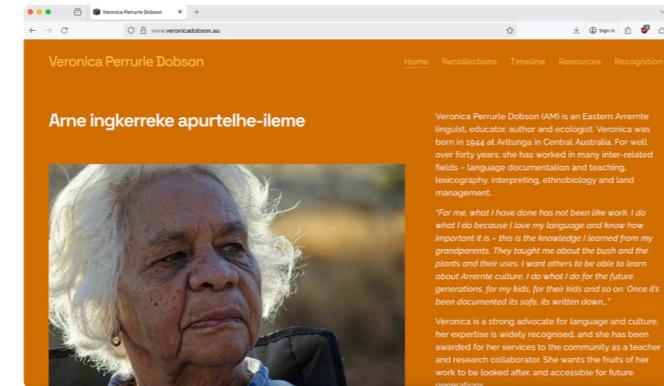

A collaboration with the Centre for Australian Languages and Linguistics (CALL) at Bachelor Institute of Indigenous Tertiary Education brought together the incredible life's work of Veronica Perrulle Dobson (AM). Veronica is an Eastern Arrernte elder, linguist, educator, author and ecologist, whose advocacy and work for language and culture is widely recognised and deeply respected. For over four decades, she has worked in many inter-related fields—language documentation and teaching, lexicography, interpreting, ethnobiology and land management. Her vast body of work is presented for the first time through *Arne ingkerreke apurtelhe-ileme* (Gathering all the things together).

**Image** *Arne ingkerreke apurtelhe-ileme* project team: Angela Harrison, Camille Dobson, Veronica Dobson, Jennifer Green and Ben Foley. Photo by Charlee-Anne Ah Chee.

The project website is a guide to Veronica's life, work and publications and contains links to archival collections of her work. This project provided a workflow for developing 'person-centred collections'. Many archival collections revolve around non-Indigenous collectors who have recorded and accumulated material over their lifetime. Person-centred collections reframe our focus and enhance our understanding of the collection items by showing them as the cohesive work of an Indigenous knowledge holder.

**Visit the project website >**

**Image** *Arne ingkerreke apurtelhe-ileme* website.

**Image** Gwen Warmbirrri, Alex Hohoi and Jacinta Burukumalawuy at Djalkiri Keeping Place, Milingimbi.

### **First Languages Australia National Collections Strategy for First Languages**

LDaCA and First Languages Australia (FLA) commenced work on the National Collections Strategy for First Languages. The project focuses on self-determination, community control and the right for First Language communities to access, use and store their language data. The project is grounded in principles of Indigenous Cultural and Intellectual Property rights and Indigenous Data Sovereignty and Governance.

FLA, with support from LDaCA, is leading the collections strategy, with the participation of community art, culture and language hubs, and state and national institutions.

In 2025, the LDaCA and FLA team undertook a listening and learning phase of the project. This involved travelling across Australia to learn about current contexts and approaches to community collection management. Alongside the primary work, the team also provided advice for individual collections and, in some situations, provided emergency data security services.

Outcomes of the strategy will include practical hands-on guides and recommendations for community organisations working with various aspects of collections, as well as a report to the Joint Council on Closing the Gap.

# OUR WORK IN THE MEDIA

## Bringing language research into the public conversation

### Vulgar language

Research by CI Martin Schweinberger and colleague Kate Burridge (Monash University) on vulgar language in online spaces received national and international media coverage this year. Martin's and Kate's research uncovered who swearing the most online by country—with surprising results! The journal article was published as part of a special issue of *Lingua* on bad language, edited by Martin, Kate and Paula Rautionaho (University of Eastern Finland). Martin was interviewed on ABC Drive Brisbane, ABC Drive Melbourne and 10News. The research made headlines in many media publications including The Conversation, CNN, The Guardian, Brisbane Times and on SBS.

[Read the article >](#)

### Unparliamentary language in Queensland

In October, Sam Hames was interviewed by ABC News for an article about the history of unparliamentary language in Queensland. Sam explained how the language that is considered unparliamentary has evolved over time, reflecting broader changes in society.

# CONTRIBUTING TO SKILLS DEVELOPMENT

## Supporting capability-building through workshops and training

### ARDC Summer School & Indigenous Data Governance Masterclass

In February, we participated in the Australian Research Data Commons' (ARDC's) HASS and Indigenous Research Data Summer School, offering sessions in the FAIR and CARE principles, data management and computational analysis. Robert McLellan delivered an Indigenous Data Governance Masterclass with Levi Murray (previously Indigenous Data Network, University of Melbourne), sharing knowledge and tools for ethically managing Indigenous data with 160 attendees.

[Read more >](#)

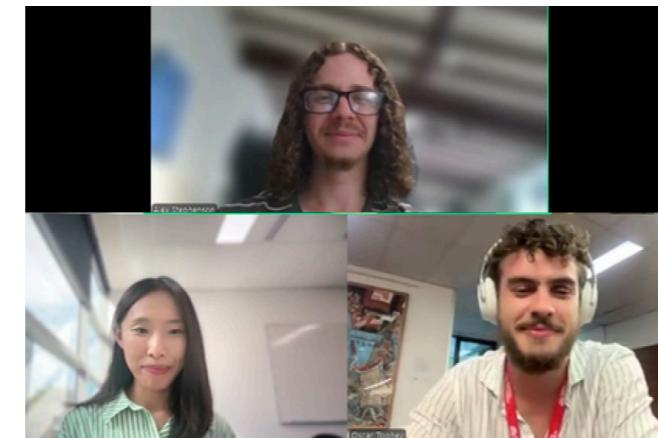

**Image** Robert McLellan presenting at the presenting at the 2025 ARDC Indigenous Data Governance Masterclass. Photo by Marc Grimwade, supplied by the ARDC.

### Graduate Digital Research Fellowships

LDaCA delivered its Graduate Digital Research Fellowship program for the third year in 2025, expanding its reach by moving fully online and welcoming fellows from across Australia. The cohort were supported by mentors from the LDaCA team and our partner organisation, QUT Digital Observatory. Our 2025 fellows had varied research topics, covering applied linguistics, heritage studies relating to language data and public policy in relation to alcohol.

Expressions of Interest for the 2026 Graduate Digital Research Fellowships are open now.

**Image** Ben Foley (LDaCA) presenting at the Darwin digital languages collections workshop.

### Darwin Digital Languages Collections Workshop

From 24–28 March, the LDaCA team hosted a digital languages collections workshop in Garramilla/Darwin. This event brought together organisations and individuals from the Top End to exchange ideas and insights about Indigenous language collections and explore collaborative opportunities. During the week, we introduced participants to technologies, processes and practices to support their work with digital language collections and explored useful tools, such as the Crate-O platform, in hands-on sessions. Participants also engaged in a collaborative brainstorming

session focused on metadata. The week concluded with rich conversations involving FLA, Libraries and Archives NT, Aboriginal Resource and Development Services (ARDS) and the Bininj Kunwok Regional Language & Culture Centre. These conversations explored sustainable strategies for managing language collections while prioritising community needs. The collaborative nature of this event laid the groundwork for a vibrant community of practice and highlighted the power of working together.

# SHARING KNOWLEDGE & STRENGTHENING NETWORKS

Sharing our work and learning from peers nationally and internationally

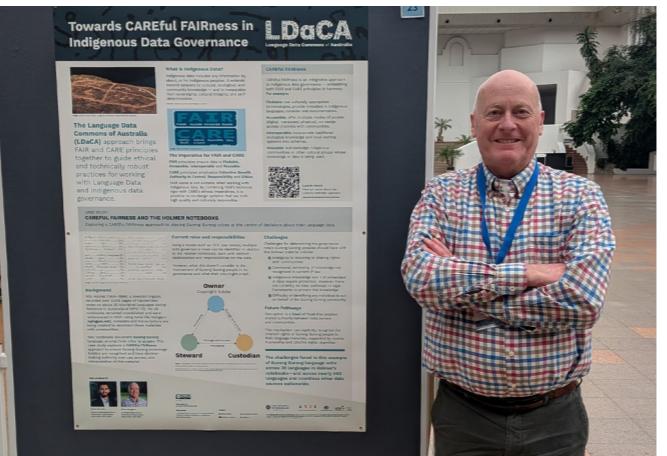

## PULiiMA

We were a proud sponsor of PULiiMA 2025 (27–29 August), alongside the ARDC and welcomed attendees at our shared stall over the course of the conference. Our team also presented a themed session on ‘Language technologies and community-centred decision making’. The session aimed to demonstrate how modern tools and Indigenous-led approaches can strengthen connections between communities, language workers and institutions.

## CLARIN Annual Conference

Robert McLellan and Simon Musgrave presented at our advisory partner CLARIN’s Annual Conference in Vienna, Austria in early October. Robert and Simon delivered a session about LDaCA and our work and a poster on Indigenous Data Governance. They also had the chance to engage with the international research community and meet with potential collaborators.

Cooke, Steele (AARNET), Alex Ip (AARNET), Adam Bell (AARNET), Simon Musgrave & Rosanna Smith. (2025, October 13–16). *CAREful Linking of FAIR Language Data to Reproducible Jupyter Notebooks* [Poster session]. SciDataCon 2025 (International Data Week), Brisbane, QLD.

Haugh, Michael & Sam Hames. (2025, October 13–16). *The Language Data Commons of Australia: Supporting research for diverse communities* [Conference presentation]. SciDataCon 2025 (International Data Week), Brisbane, QLD.

Sacal Bonequi, Moises & Chenoa Pettrup. (2025, October 13–16). *The PILARS Approach: Designing Sustainable, Ethical and FAIR archival repositories* [Poster session]. SciDataCon 2025 (International Data Week), Brisbane, QLD. <http://doi.org/10.5281/zenodo.17240111>

Lynch, Michael, Eve Ansell (QCIF), Nichola Burton (ARDC), Ian McCrabb & Peter Sefton. (2025, October 20–24). *Sustainable Digital Humanities Collections* [Conference presentation]. eResearch Australasia 2025, Brisbane, QLD.

Sefton, Peter, Rosanna Smith, Simon Musgrave & Michael Lynch. (2025, October 20–24). *Low friction FAIR interoperability using RO-Crate metadata in text analytics pipelines* [Conference presentation]. eResearch Australasia 2025, Brisbane, QLD.

Sefton, Peter, Rosanna Smith, Nichola Burton (ARDC), Robert Fleet (QUT) & Michael Lynch. (2025, October 20–24). *Someone said to do RO-Crates? RO-Crate Birds of a Feather session meet colleagues and give feedback* [Conference presentation]. eResearch Australasia 2025, Brisbane, QLD.

## NOVEMBER

Lee, Kelvin. (2025, November 4). *Artificial intelligence in corpus linguistic research* [Webinar]. Sydney Corpus Lab Dinner Talks.

Kemble, Melissa (USyd) & Monika Bednarek. (2025, November 7). *New tools for analysing Australian English: The case of emotion words and gender stereotyping* [Conference presentation]. 8th Forum on Englishes in Australia 2025, Melbourne, VIC.

Smith, Rosanna & Simon Musgrave. (2025, November 7). *Sharing the Australian Slang Survey Data collection* [Conference presentation]. 8th Forum on Englishes in Australia, Melbourne, VIC.

Schweinberger, Martin (2025, November 10). *Vulgarity in World Englishes* [Webinar]. University of South Australia. <https://www.youtube.com/watch?v=YOEfJMZh4KM>

## DECEMBER

Hames, Sam & Naomi Barnes (QUT). (2025, December 2–5). *Hacking the Hansard: A critically informed approach to digital heritage archival work* [Conference presentation]. Digital Humanities Australasia 2025, Canberra, ACT.

Thieberger, Nick. (2025, December 2–3). *The Written and the Recorded: AI in the workflow from analogue materials to textual corpora* [Conference presentation]. 2025 Canadian Australian Partnership for Open Scholarship (CAPOS) gathering, Canberra, ACT.

Hames, Sam & Simon Musgrave. (2025, December 2–5). *Get Started with Federal Hansard* [Workshop]. Digital Humanities Australasia 2025, Canberra, ACT.

Musgrave, Simon, Peter Sefton, Robert McLellan, Sam Hames, Ben Foley & Nick Thieberger. (2025, December 2–5). *Enriching the Ecosystem: LDaCA and DH in Australia* [Conference presentation]. Digital Humanities Australasia 2025, Canberra, ACT.

Sefton, Peter, Nick Thieberger & Michael Falk. (2025, December 2–5). *RO-Crate for a data commons* [Conference presentation]. Digital Humanities Australasia 2025, Canberra, ACT.

Barth, Wolfgang (2025, December 2–5). *Landing Pages for Linguistic Data Collections: Enhancing Access and Accountability in Variation Research* [Conference presentation]. Australian Linguistic Society Conference, Gold Coast, QLD.

Gnevshева, Ksenia, Catherine Travis & Gerry Docherty. (2025, December 2–5). *What it means to be a local: The role of local attachment in vowel realisations in regional Australia* [Conference presentation]. Australian Linguistic Society Conference, Gold Coast, QLD.

Wood, Bronwyn, Catherine Travis & Gerard Docherty (2025, December 2–5). *Sounding Australian: Retraction of (str) across real and apparent time in spontaneous speech* [Conference presentation]. Australian Linguistic Society Conference, Gold Coast, QLD.

## Acknowledgements

LDaCA wishes to acknowledge the collaborating institutions participating in the project

The Language Data Commons of Australia (LDaCA) (DOI: [10.3565/kq2v-9g52](https://doi.org/10.3565/kq2v-9g52)) is a co-investment partnership with the Australian Research Data Commons (ARDC) through the HASS and Indigenous Research Data Commons. The ARDC is enabled by the Australian Government's National Collaborative Research Infrastructure Strategy (NCRIS).
